Md. Mohi Uddin

Full-Stack Developer | FinTech & Banking Software

Khilkhet, Dhaka-1229, Bangladesh | 01607341005 | mohiuddin4296@gmail.com | Portfolio | GitHub | LinkedIn

Summary

FinTech-focused full-stack developer with 6+ years of experience in banking IT and Core Banking Systems (CBS), now building FinTech platforms: an AI-assisted loan underwriting system and a rule-based anti-money laundering (AML) transaction monitoring platform. Hands-on with JavaScript, TypeScript, Next.js, React, Node.js, Prisma and PostgreSQL, plus a Python OCR microservice. Deep domain knowledge of banking operations, UAT, regulatory reporting, compliance workflows and financial system support.

Projects

LoanWise AI: AI-Powered Loan Underwriting System | Next.js, TypeScript, Prisma, PostgreSQL, FastAPI, PaddleOCR, Groq | Live Demo | GitHub

- Built an internal loan underwriting platform where loan officers submit applications and credit managers review AI-assisted reports and approve or reject
- Developed a Python FastAPI OCR microservice (PaddleOCR, PyMuPDF) that extracts and validates data from salary slips and bank statements, using native text for digital PDFs and OCR fallback for scans
- Designed a hybrid engine: deterministic rules compute eligibility, risk score, affordability and EMI, while a Groq LLM writes the reasoning report
- Implemented role-based access, audit logging and Zod-validated forms

AML Monitoring Platform: Transaction Monitoring and Alert Investigation | Next.js, TypeScript, Prisma, PostgreSQL, Vitest | Live Demo | GitHub

- Built a rule-based transaction monitoring system with five detection rules (large cash, structuring, unusual activity, rapid fund movement, high-risk jurisdiction) and weighted 0–100 risk scoring that generates alerts automatically
- Implemented the analyst workflow: alert triage, investigations with notes and status, customer risk profile updates and a full audit trail, with ADMIN/ANALYST roles
- Wrote Vitest unit tests for the rule engine, risk scoring and transaction processing, mocking Prisma

Shopping Cart (Toddler's Outfits) | React, React Router, Vercel | Live Demo | GitHub

- Built an e-commerce SPA with variant-aware cart logic, context-based state management and real-time shipping calculation, deployed on Vercel

Experience

Assistant Officer, ICT Division | Sammilito Islami Bank PLC, Dhaka (First Security Islami Bank Unit) *Feb 2021 – Present*

- Operated Core Banking System (CBS) EOD, EOM and EOY processing along with backup and recovery, ensuring system reliability and data integrity
- Coordinated User Acceptance Testing (UAT) across vendor-delivered CBS modules, triaging defects and working with vendors on deployment and support
- Defined requirements and led UAT for an SMS module access-control improvement introducing unique user ID handling across branch transfers
- Led UAT and branch rollout of vendor-built Digital Locker Management and Collateral Security Tracking systems (FDR, DPS, shares, real estate), replacing manual tracking with automated workflows
- Contributed to BRPD Circular-15 & 5 (Bangladesh Bank classified loan reporting) compliance by supporting automated classified loan reporting in CBS

Junior Software Engineer | Logical Triangle Limited, Dhaka *Aug 2019 – Feb 2021*

- Rebuilt and optimized an Inventory Management ERP in Laravel, improving system performance
- Enhanced a Pharmaceutical ERP using ASP.NET MVC and RDLC reporting, improving data accuracy
- Integrated secure payments and appointment booking into the HelloDoctor.Asia telemedicine platform
- Built bilingual web applications with HTML, CSS, JavaScript, SQL and PHP to client requirements

Skills

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML, CSS
Frontend: React, Next.js (App Router), Tailwind CSS, shadcn/ui, React Hook Form, Zod
Backend: Node.js, Express, REST APIs, Next.js Server Actions, FastAPI, JWT, Better Auth, Passport.js
Data and AI: PostgreSQL, Oracle, Prisma ORM, Supabase, Groq API, PaddleOCR
Tools: Git, GitHub, Postman, Vitest, Vercel
Domain: FinTech, Core Banking (CBS), Loan Underwriting, AML / Transaction Monitoring, Risk Scoring, Regulatory Reporting, UAT, Audit Logging, Role-Based Access Control, OCR / Document Processing

Education and Certifications

B.Sc in Electrical & Electronic Engineering, East West University *2019*
Full Stack JavaScript, The Odin Project | AIBB (Associate) | JAIBB (Junior Associate), Institute of Bankers, Bangladesh
